Jackson– Westyn Gibbs	Smith– Ansley House
James– Jacob Elliot	Corley– Andrew Hunt
Elder– Bryce Vogt	Maxwell– Sierra McFarling
Gregory– Ellen Meserve	
Walz– Talon Singleton	

Nursing News

Unfortunately, cold and flu season has arrived. Although we cannot avoid all the germs out there, let's work together to help everyone stay as healthy as possible. Below are a few helpful tips to use during this time to help reduce the spread of germs.

1. Frequent hand washing is the BEST way to prevent and combat the spread of germs! Wash hands often with soap and water. If soap and water are not available use hand sanitizer.
2. Cover coughs and sneezes with a tissue or use an elbow or arm if no tissue is available.
3. Do not share drinks, food, or utensils.
4. Get plenty of rest, eat healthy foods, and drink lots water and healthy drinks.
5. Stay home when you are sick and try to avoid others that you know are sick.
6. Disinfect surfaces that are prone to germs (ex. phones, keyboards, door knobs, toothbrushes).

If you're unsure whether or not to keep your child home please follow some of the guidelines listed below.

Please do **NOT** send your student to school if he/she has:

1. Fever 100.5 degrees or higher. They must be fever free **without** medication before returning.
2. Vomiting or diarrhea. They should be symptom free for 24 hours before returning.
3. Sore throat with a fever and/or rash. If they have been diagnosed with strep throat they may return 24 hours after starting an antibiotic.
4. Any rash that you can't identify or that is accompanied by a fever. Please check with the doctor to make sure it is not something contagious.
5. Eye redness that has drainage/discharge. Please have them examined for pink eye. If they have been diagnosed with pink eye they can return to school 24 hours after starting an antibiotic.
6. A persistent cough or bad cold symptoms that they have had for a while and that is not relieved with medication.
7. Head lice-- No live lice may be present per district policy. The child needs to be treated with a lice treatment and nits removed. Students should be brought to the school nurses office for a head check prior to classroom re-entry.

Thank you for your help in keeping all the kids safe and healthy. If you have any questions or concerns please call the school at (270) 927-7900
